Dear Paul

I would just like to pass comment on the excellent work that you have undertaken in relation to our ground floor refurbishment and all the associated trades you had to engage with, including Bromley Building control.

The work is of extremely high quality, was completed to schedule and priced appropriately, given our changing needs through the works. Your trades respected our property and our specific working requirements given the specifics of the site and we were much appreciative of these.

We look forward to working with you and the team in the future, as we continue to bring the property to our exacting requirements.

Regards
